Helen Bye

Dear Parents and Carers

After half term, in science we will be focusing on animals including humans. Within this we will be studying life cycles. These are the objectives we will be covering:

- Describe the changes as humans develop to old age.
- Identify scientific evidence that has been used to support or refute ideas or arguments.
- Describe the life process of reproduction in some plants and animals.
- Plan and carry out a range of enquiries, including writing methods, identifying variables and making predictions based on prior knowledge and understanding

Please note that this is different from the SRE curriculum, which you will be receiving more information about shortly. Please let the school know if you would like to know more information about this or a sample of the resources we will be using.

Yours sincerely

**Mr Wilson and Miss Proud
Year 5 Teachers**
